Curriculum Vitae (CV)

What job i'm looking for? My positive points

Thank you

Preferred occupation **Engineers**
 Dear Sir/Madam **Engineering jobs**

I am applying for the position of Boilermaker with Transnet. After viewing the responsibilities and Preferred work location **newcastle** skills needed in your posting, I believe that I am qualified to fill this position.

I have a Boilermaker NQF level 4 and a trade test certificate and I have completed my

Contacts and general information about me

apprenticeship program where I gained hands on experience making boilers. I know how to use all

Day of birth **1989-01-16 (35 years old)**
 of the hand and power tools needed in this profession efficiently and I have the desire and Gender **Male** determination to be one of the best in this field.

Residential location **Newcastle Osizweni**

I know how to read blueprints and how to precisely measure and cut the materials used to the

desired measurements. I have experience bending and welding pieces into shape without distorting

the materials, which can happen when it shrinks, expands or warps. I can then connect the pieces

by bolting or riveting them together. *Information is available only for registered users.*

I can do installation of copper steaf, Maintenance and replacing old beams, pipe work and structural

Steel such as: Chutes, Platforms, Handrails, Coke coal crusher, Torpedo, Heat exchanger for

Salaries, wish **15000 R per month** maintenance at boiler house, stainless pipes and valves, maintenance work

How much do you earn now **10000 R per month** work in the power, changing of water pipes, maintenance of beams, changing of flexible pipes.

Lubrication of plant is done daily. Repair to the same standard or better than before the breakdown.

Effective fault finding to enable minimum down time. Resources coordinated with production to minimise downtime, Timeous replacement of wearing parts. Completion of all mandatory checklists.

Daily inspection of work area to identify pending faults and high risk areas. I can also inspect the finished product for defects and make repairs if needed before shipping out.

I have the agility, coordination and the technical skills needed for this job and the ability to ensure they meet environmental standards. I am capable of meeting the physical demands it requires as well, which includes lifting, stooping, bending and working overhead.

I have experience operating forklifts and cranes to move the heavy materials and the finished product around the warehouse. I have included my resume with complete details of my skills and training. I am sure you will agree I have what it takes to be a Boilermaker.

I am looking forward to here from you
