Curriculum Vitae (CV)

What job i'm looking for? My positive points

Honestly I have been studying Electrical Engineering at Mangosuthu University of Technology from 2017 to 2019 since then I have been struggling to find a job in service Training (P1&P2) to finish my studies, Currently am looking for any job that have the requirements that I meet within your company I am not choosy for that matter. Being a fresher, I think I am very flexible and adaptive to learning new things. I am sure I will be able to contribute something capable for the growth of the company. My last project at MUT has taught me how to be a team player and a hard worker.

I really hope you'll find it in your heart to help me get this job, thank you in advance. Can't wait hearing from you.
