

Brian Biza

Curriculum Vitae (CV)

What job i'm looking for? My positive points

With a formal background in geotechnical career paired with my field expertise, I am pleased to be applying for the geo technician position within Platinum mines. I am certain that my strengths make an excellent fit for the role and I am confident that it would be a great opportunity for me to further grow both personally and professionally

My career includes a year of working as a geo technician at Unki mines. There I was given responsibility for conducting professional field investigations, collecting samples, core logging, grade control, and coordinating detailed ground surveys. Also I grew and understood much better as one's responsibility to keep safe through safety programs. Furthermore I became a better experienced student by conducting permitting and compliance programs for the company.

Throughout the times, I have proved numerous times that I am a great team player with a data driven approach and the important ability to think critically and solve complex problems.

Thank you for your time and consideration.
