Curriculum Vitae (CV)

What job i'm looking for? My positive points

I am a young man who is very intelligent having got couple of qualifications educationally. I am seeking job opportunities here just to contribute in the mining sector, as it is one of the economic engines in our South Africa. If possible I would like to be deployed amongst other underground workers that dig minerals, particularly gold. I am a holder of Bachelor of education degree, and furthering my studies as I am currently doing honors' degree in education. However, should the green pastures present themselves I will cease this journey of school, due to financial instabilities. I am a very hardworking , energetic, and smart gent who is willing to collaborate with the team to achieve the company's objectives. Realizing myself employed in any of the positions in the mining sector will be a "dream come true" scenario to me.
