

Jimmy Evidence Seema

Curriculum Vitae (CV)

What job i'm looking for? My positive points

performance of a dam. Monitoring loads on tiebacks or rock bolts and movements within a slope can provide an indication of the performance of a drainage system installed in a stabilized slope.

I AM LOOKING FOR INSTRUMENTATION MECHANICIAN JOB.THEN I WILL DELIVER BEYOND YOUR EXPECTATIONS

Breferred accupation Engineering jobs

Instruments of interest in a site investigation are pore-water pressure, permeability of the soil, and slope stability.

Contacts and general information about me

Dayion Wethication 1998-04-03 (26 years old)

(institution and to check that performance is as predicted.

Restitutemental locate from the initial phase of warprejectements but at two mentions to

modify the design in later phases.

Ematractions Control Information is available only for registered users.

Instruments are used to monitor the effects of construction. Instrument data can help the engineer

determine how fast construction can proceed without the risk of failure. **Additional information**

Salary you wish R45000 R per month

Ouality Control How much do you earn now na R per month

Instrumentation can be used both to enforce the quality of workmanship on a project and to

document that work was done to specifications.

Safety

Instruments can provide early warning of impending failures, allowing time for safe evacuation of the area and time to implement remedial action. Safety monitoring requires quick retrieval, processing, and presentation of data, so that decisions can be made promptly.

Legal Protection

Instrument data can provide evidence for a legal defense of designers and contractors should owners of adjacent properties claim that construction has caused damage.

Performance

Instruments are used to monitor the in-service performance of a structure. For example, monitoring parameters such as leakage, pore-water pressure, and deformation can provide an indication of the
