Work experience

Working period **nuo 2021.10 iki 2022.04**

Company name Glass partners Springfield

You were working at: Machine operator

Occupation Junior furnace operator

What you did at this job position? Read and measure incoming glass accurately with a tape measure. Inspect all incoming glass for irregular breaks, scratches and uneven edges. Review process instructions in the job card and drawings. Perform routine maintenance on the furnace (cleaning the rollers) before toughening Start machine to verify setups and adjust machine controls to alter temperature, alignment, speed and pressure as per glass type. Toughen glass according to daily production plan received from the supervisor. Properly make substance changes and convection adjustments to tempering furnace when needed without causing quality issues. Read and fill out proper documentation (hard copies and electronically). Observing all applicable safety requirements and reporting immediately any unsafe practices or conditions. Maintain daily production record such as quantity, dimensions, square meters, cubic meters and material type by means of a standardized production sheet. Scan and confirm every good glass before sending to the next station and scrap rejected glass in order to make replacement. Put the right stamp/logo at the right position on the glass before toughening as per customer product specifications. Ensure that the work is done according to the furnace standard operating procedure Sign off job card after completing the job. Ensure that glass test pieces are toughened every 1 hour as well as when switching to a new substance. Maintain a safe, clean and organized area at all times. Properly handle all chemical within safety guidelines. Help out with other production/operations duties depending on glass production requirements.
