

Asive Mniki

Curriculum Vitae (CV)

What job i'm looking for? My positive points

I am Asive Mniki, a 23 year old mechanical engineering graduate from the Cape Peninsula University of Technology. I am a great team player, very dedicated individual from a very disadvantaged background. My upbringing has determined the man that I am today. I'm looking for any mechanical engineering position. I'm capable of doing any of the work in the field as I believe that I have enough experience to do so. I have done quality control, piping, flange management, document control and even more in mechanical engineering. My aspirations in the industry is to grow through everyday learning and hope to achieve all my goals through dedication and discipline. I am one individual who puts their mind to any project handed to them as a project is to be finished through team work without questions. A decision made by great minds from many alternatives comes with great results. I am always open to learning everyday as I believe that we learn till we die. I am a good time manager and I know that time is a luxury we cannot afford in the engineering industry. Given a chance, my work would do the talking for me. I'm looking forward to working with the company.
