metallurgy or related. I enjoy creative problem solving and getting

Additional information

exposure on multiple projects, and I would excel in the collaborative environment on which your company prides itself in. I look forward to building a strong long-term career path and to enhance my educational and professional skills in a stable and dynamic workplace. I describe myself as a genuine hardworking individual who is open to explore or learn other things beside my area of specialization.

About two years' worth of work experience in the Chrome/PGM Plant obtained at Mototolo Concentrator.

- Worked alongside plant process metallurgists to establish key elements in the current processes with a goal to increase production and stabilize the plant.
- Contributed to the plant safety by identifying potential risks or hazards in line with Mine Health and Safety Act (MHSA), section 22 – drafted a memorandum to the Metallurgical Technical Engineer and Safety Officer to highlight safety concerns within the plant and the recommendations were adopted.
- Contributed towards conducting the following project: laboratory scale test works, commissioning of cyclones and debottlenecking projects
- Conducted an efficiency study of the Starlims software in the metallurgical laboratory
- Interpreted laboratory assay results and reported back to the management via memorandums or PowerPoint presentations.
