

# Bilal Abdul Quddus Mughal

Curriculum Vitae (CV)

## What job i'm looking for? My positive points

I am a hard worker person and have a skills to work under pressure. To accomplish a task I fight until my last try. I like to work as an engineer, such as production engineer and manufacturing. Also as Industrial safety as well.

Another quality is to find a root cause of a problem. I start my search level from lower level ( Root ) to higher level to analyze and understand the whole system. Then make plans to reduce errors and improve the process to increase the profit.

Also I have a skills to be a team leader, and prefer to participate with them in work. My way of leading a team is to understand each other and have a better communication with them.

I like to communicate face to face instead of phone calls or by emails. It adds more skills and encouragement in me to deal with people.

Last but not least If a challenge is tough, I work overtime to complete it within a given time frame.

Preferred occupation	Engineers Engineering jobs
Preferred work location	Bloemfontein Free State
