Curriculum Vitae (CV)

What job i'm looking for? My positive points

Hi my name is gbagnonhoue romuald, i'm looking for engineering mechanical,checking stockes or return stores. i also work as a vonlentry Almost all the graduate roles are in one of two areas: manufacturing/engineering or supply operation/logistics. And for both of these areas graduates from different disciplines would be doing similar jobs as each other. The reason for this is that the real "work" is not defined in nice separate buckets of mechanical, electrical, chemical etc, but normally a mixture of different disciplines as a general manufacturing or logistics engineer. Graduates will pick up skills from other disciplines as they go through their training and career. I started as a quickly learned basic mechanical and

engineering principles that were needed to help me in my work.'
