Curriculum Vitae (CV)

What job i'm looking for? My positive points

I am a young qualified electrician who enjoys working in the electrical trade industry, my job is also a hobby of mine, I have experience with Domestic, commercial and industrial single and three phase installation, repaires and maintainance, I would say I have a very good understanding of electrical drawings, and methods of installations as the installation rules and saftey procedures are the same. The components used differ in size, structure, manufactures specifications, power rating, IP rating and duribility in each different sector/environment. Eg "photo cell used in domestic installations uses the same power rating but different structural mounting as the ones used in street lights" there a number of examples but the point is my experience and knowlegde gained throughout the years of working, would make me an asset to any company then a liability, given additional knowlegde to what I already know becuase electricity is universal but methods of implementation are always unique

I hope who ever gets the chance to read this letter share's the same passion or even more of electricity as i do.

Thank you very much Preferred occupation Electricians Construction jobs Preferred work location Johannesburg Gauteng Contacts and general information about me Day of birth 1989-04-14 (35 years old) Gender Male **Residential location** Durban City KwaZulu-Natal Telephone number Information is available only for registered users. <u>Sign in</u> Email address Information is available only for registered users.
