

Maama Zani

Curriculum Vitae (CV)

What job i'm looking for? My positive points

The penis has three main chambers: two larger ones on top and one smaller chamber on the bottom. The medical terms for these chambers are: (Corpora Cavernosa) and (Corpus Spongiosum).

When you get an erection, blood fills these chambers. The main blood holding tissue is the Corpora Cavernosa. Your penis size is determined by the amount of blood that flows into these chambers when you get an erection. Once the maximum is reached, you are at full erection. This is where our program can benefit you. The tissue in these chambers can be safely increased in size, to improve your penis size.

Does Penis Size Matter?

According to a recent survey conducted by a Condom Manufacturing Company, 67% of women said that they are unhappy with their lover's penis size. Proof that penis size does matter! A larger penis has much more surface area and is capable of stimulating more nerve endings, providing more pleasure for you and your part

Why our System?

Our unique Size Up Cream leads to extra blood flow in the penis chambers leading to a big and stronger penis size.

How long will it take to see results?

- Day 3 - Stronger and Harder erection
- Day 7 - Increase sex drive + Ejaculation control
- Day 14 - Increased length and thickness (girth)

The main ingredient of this Size Up Cream is Mulondo roots it is a native African herb, this herb has been used since centuries for male enhancement. It carries natural aphrodisiac properties that is said to restore the vitality of manhood by offering enhanced self-confidence and lovemaking ability. call or whatsapp Prof +27710399635,

Preferred occupation	Project managers Management, human resources jobs
