

Timothy Nolte

Curriculum Vitae (CV)

What job i'm looking for? My positive points

I have 30 years of production and manufacturing experience under my belt. I consider myself to be a diligent, results-driven and highly adaptable person. I am able to think and react in a high stress environment and make the required decisions accordingly. I am self motivated with strong work ethics and I able to work confidently with little guidance.

Taking responsibility and accountability is of high importance to me, I believe in understanding each person in my team and leveraging off their strengths and understanding their weaknesses in order to be surrounded by a strong team who trust and rely on eachother and who share their skills and knowledge.

My greatest work achievement was when my team and myself manufactured a CM-310 which is a fluoro GRP Vessel 6 meter in diameter and 18.5 meter in length making it the largest fluoro plastic vessel built in the Southern Hemisphere which is testament to what a strong team can accomplish together.
